#### FINDING OF THE DIAMOND RING. ON FIRST SUNDAY AFTER ADVENT | MACHINERY VERY COMPLICATED

Smacks of Old Bureaucratic Regime -Final Authority Goes Back to The Emperor.

St. Petersburg, Nov. 2, 12:10 p. m .-The imperial decree creating the cabinet ministers under the imperial manifesto granting a constitution to Russia was gazetted this morning and has already aroused criticism, as the machinery is extremely complicated ans smacks of the old fashioned bueraucratic regime. The relations of the cabiner to the council of the empire or because the powers of these bodies are yet to be defined under the manifesto.
Two features are especially unsatisfactory. While the cabinet has no authority to decide matters within the competency of the legislative bodies, no measure of "general importance" can be introduced into the chambers without the sanction of the cabinet, and another provision requires that when the cabinet is unanimous the premier must go to the emperor and receive instructions. This would seem to make the final authority go back to the emperor. Moreover, all questions affecting the imperial court and domains, the army and navy and foreign affairs are specifically excluded from the competency of the cabinet without direct imperial authority. By implication these competency of the legislative bodies perial authority. By implication these great questions in which the nation is vitally interested are also outside the competency of the legislature and therefore are bound to prove unsatisfactory to the representatives of the people when they assemble.
